City hall reports

Mirror reports

Thus, he added, the city's only real expense for doing the state's work is the cost of any cinders thrown along those routes.

And its trict representative from the state's bepartment of Environmental Resources' office last Wednesday visited the Peta Avenue site where two electrical transformers were stored.

Sone residents of the area had expressed concern that storing the transformers there produced a health hazard since there was the possibility that the transformers contained the cancer-causing agents PCB's.

Last Wednesday that worry was dispelled when the Wilkes-Barre office representative of the DER visited the city to examine the transformers.

According to Martin P. Judge, city

Thus, he added, the city's only real expense for doing the state's work is the cost of any cinders thrown along those routes.

And, besides, he pointed out, city residents call city hall to complain about the streets — whether the state or city is supposed to maintain them.

The state, he added, does not have the mapower or equipment it used to and its response time is much slower than a few years ago.

So, the city administration feels that the transformers contained the tane-cared-for streets would not be cleared. Surface will have to be covered with temporary pave, be said, so that the road's surface will have to be covered with temporary pave, be said, so that the road will not be left a mud puddle during the winter.

Downtown sidewalks

The construction of new curbs and side-walks in the block on South Main Street between Sixth Avenue and Seventh Avenue will start sometime in the spring.

A representative of the state's Department of Community Affairs visited the city last Wednesday to inspect the project site.

of the DER visited the city to examine the transformers.

According to Martin P. Judge, city administrator who accompanied the DER man, "It's his determination that the transformers are empty."

An earlier inspection of the site by representatives of the Pennsylvania Power and Light Co. (PP&L) had determined the same (see last week's Carbondale MIRROR last week.

That's what Judge told the Carbondale MIRROR last week.

There's been a minimal amount of street mewed for curbs and sidewalks, the city administrator said. Exactly how much, he couldn't say, but he said it's only a couple of inches from each side.

The Solons noted that the extra parking meters resulting from the recent placement of dual-head meters should be placed where parking meters should be, but aren't.

transformers.
Although it was determined that the transformers do not contain the PCB's, the owner of the transformers, John Baumann, agreed to move the electrical pieces further hack into the junk yard there to prevent youngsters from playing around and on them.

Couldn't say, but ne said it's only a coupe of dual-head meters should be placed where parking meters should be, but aren't.

A city hall source said, "We'll get to them when we can."

"This is the first time I heard of it That's what Martin P. Judge, city administrator, told the Carbondale MIRROR. At the last city council meeting a low bid of \$20,228 was presented by Keystone Pavement and Equipment.

Budget Work begun

At the beginning of the month, the city's finance office started work on the 1982 city budget.

According to city hall sources, some preliminary figures for the budget were drawn up early last week.

Inspector's report

Building inspector Walter P. Turonis lists 5 building permits issued during the month of September.

The total valuation of the permits amounts to \$99,200. Permit fees collected amounts to \$99,200. Permit fees
